

CHAPTER 9

Passive Aggressiveness Anyone.

~OR~

‘You can’t make me, you can’t make me,’ say VA bureaucrats, Bronx Cheer!

Another passive aggressive protest against the mistreatment we vets receive from the institution, VA has a very large problem with Vet appointment *no shows*. On the surface, it appears Vets are at fault for this behavior; however, no one asks what VA staff is doing to harass, cause and encourage our 'misconduct.' One reason is schedulers make veteran appointments to pad work demand for overtime and holiday pay. In the system supervision sees high demand so schedules employees to work premium pay time. Most do not show up for work at all because there is no real work and no one is watching them anyway. The vet is gigged for a missed appointment, which often is completely unknown to him, that only serves to pay the employee for doing nothing. Some schedulers after being asked to work will cancel the phony appointments. The lazy ones simply let it go as the vets problem. Another reason for no shows is veteran passive-aggressive protests against abusive bureaucracy abusing vets. Complaints gig the supervisors and upper management. The AFGE worker screams ‘Call my union committeeperson’ should disciplinary action fall on s/he! I asked a nurse why so many no shows and she said, ‘ they [vets] get meds refilled then do not show up for follow up appointments we make for them’ then left it at that. The rest of her unsaid sentence, [‘and to avoid the harassment, exploitation, inconvenience, waste of time waiting all day for an appt, and worse abuse s/he faces when coming to VA.’] Now I recognize all of the aforewritten very clearly after undergoing the passive to outright direct hostile intolerance by some clinic staff employees and above-mentioned Ms. PhD doctor, and those like her. VA, same as all HMO systems, receives ‘capitation payments’ from GAO for each active vet on their rolls. More numbers mean more money every payday. Money for nothing when we are not in the clinic; losses when we are, **which is the same for ALL HMO’s private or govt run**. The exception is for those paying VA with private insurance; those FAT cash-cow fee for service patients are lured in solely for insurance billing purposes adding more profit to existing taxpayer capitation payments. Often the appointment is set up exclusively for billing without any benefit to the patient at

all. Especially, when some arrogant staff doctor harasses a veteran by placing a 'DO NOT TREAT' flags on their records because s/he talked back, aka insubordination, to one of those pompous asses. VA is paid for the visit. A vet gets the shaft while VA billing gets the insurance gold. I underwent 5 such 'DO NOT TREAT' visits charged to my health insurance before figuring out what those Nazi criminals were doing. The Rx was if signs of heart attack or stroke call 911, not us, from a incompetent NP who could not read lab reports well enough to explain them. She sandbagged appointments doing nothing but insurance billing for 7 months until untreated, dangerously high hypertension resulted in kidney failure as consequence. VA uses incompetent staff nurses substituted for qualified physicians. Another point is to harass a patient until driving away high liability, hard to treat or 'IP,' 'identified problem,' patients. In other words, once the veteran is enrolled for capitation payments, institution staff 'cherry picks and lemon drops' or 'patient dumps' high responsibility or troublesome vets by harassing them into not returning to escape liability and onus same as private sector medicine sometime does. **The difference is pvt sector loses patient revenue; taxpayer supported VA is rewarded in keeping the recurring pre-paid & budgeted capitation payments without doing the tasks: pay us for breathing and doing nothing. Possible only in an Amerikan government run, taxpayer sugar-tit supported Socialist healthcare system.** VA employees intentionally abuse, needle, and harass an identified patient until provoking the targeted veteran into a hostile reaction or into leaving for good. Then the employee plays victim and cries abuse, harassment and disrespect so the 'offensive' veteran is either banned from the clinic or humiliated into simply never returning. In other words, it is okay for them to abuse and mistreat veterans but not okay when we stand up to those abusive bullies. Understand the whole point is to drive us into never returning through mistreatment! However, schedulers make unknown, phony appointments for that registered veteran each year showing s/he visited the clinic to continue capitation payments. VA resorted to this fraud after GAO caught the agency using lists of dead veterans to bill and be paid for phony appointments treating ghosts. Now they are 'treating live' vets that do not show up for unknown, ghost appointments. Meanwhile the veteran never visited there at all. Understand that the patient never knows this is secretly going on except when a mysterious 'no show' card comes in the mail. Since that agency is going paperless odds of that happening are now rare. Absent these paper trails, computer manipulation makes VA secret 'lists' and aforementioned shenanigans much harder to detect and prove. unintended consequences of VA employee ill treatment of veterans is causing the desperate one that really need help to give up and suicide on and off VA property!!! The rest either never return or passive aggressively miss appointments as no shows. Most of us are in great pain and anguish and go to VA as a last resort, which for those who suicide is the last and final solution to their harassment and pain. What these insulting, nasty, and rude employees do is

add more pain to an already bad situation creating an out of control condition where VA is rewarded and a veteran loses no matter what! **That is the VA veteran suicide epidemic in a nutshell.** Especially prone to immediate culling are high-risk and/or suicidal mental health cases. Dumping them onto the 'Suicide helpless line' is first option; when something goes wrong the vendor is blamed for onus; next options is to offload patients to civilian 'free' clinics, VetChoice and Mission Act. Outside civilian treatment centers and vendors then bear all responsibility while VA keeps budget for misappropriation to employees and friends. On my first MHC visit, the VA, MHC, Dr. dumped me onto pvt sector 'free clinic system.' She prescribed meds, that only made me sicker, and provided brochures to civilian 'free' MHC clinics sending me out to civilian resources. In other words 'DUMPING PATIENT LIABILITY' while keeping millions of allotted unspent MHC budget in house, which was misappropriated to other non-Veteran expenses feeding useless, agency bureaucracy – VA bonuses, raises, perks and employee benefits. See GAO, OIG and media scandals about those issues. However, being a taxpayer-supported institution, culling patients does not yet carry fiscal and legal consequences that private sector medicine faces when judiciously employing patient dumping practices. I have undergone this experience at VA four times, so far. A medical staffer, usually a staff nurse or provider, such as Ms. PhD, in a private office setting provokes, needles and acts hostile toward a patient to force an emotional or violent outburst from s/he. When a Vet protests, s/he then calls for backup security to remove the person, blames and flags the veteran as a 'problem patient.' It is all the veteran's fault – it must always be the veteran's fault; he made me do it coward's cop out. In many cases, it angers & traumatizes a patient into suicide or in not returning to the clinic, **which is the point.** S/he protests by not showing up for appointments or comes in only for meds and nothing more. Suicide is the final no-show protest. VA now has another dead or disgruntled veteran undermining that agency at every turn. In other words VA made *another enemy. In the worst of cases, a Veteran kills self in a clinic waiting room or parking lot or somewhere immediately off reservation as the final protest when mental injury finally overwhelms the person, and VA laments that it cannot understand why.... Willful ignorance or convenient memory or plausible deniability when the agency does not wish to know why. That willful blindness is now costing US taxpayers billions in wrongful death suits caused by VA employee incompetence and criminal abuse.* When recognizing this **hostile projective identification** by a staff member, consciously I control my reactions against an attack evading an incident. **Then later write about it for publication. Those fools never realize veterans wear many hats in life...underground, freelance journalists for instance. We also function as VA corporate undercover intelligence and more.** Do these fools really think the top ranks of a 400 billion dollar enterprise spend all day chasing 'pageboys' or 'secretaries' around 'playing hide the wiener doing the horizontal bop' all

day? They wish to stay in power and know of most everything that the lower ranks are doing. Corporate sends in undercover 'corporate compliance & intelligence' to ensure that they stay in power, I can tell you that much. Patient Advocate sweeps veteran issues under the carpet keeping them concealed from leaving VA control or getting to top management levels. Those at the top 'conveniently' never know officially about problems at the lower 'peon' levels, so they can hide behind plausible deniability when scandal erupts. But never mistake that they know of problems affecting their power and status! Not so with scapegoated peons. Their disingenuousness often sends their ignorant asses out the door union or not. *The Jackasses leading the morons, as it were. One jackass goes out another comes into the barn.* In my case, after I challenged her the inexperienced NP as harassment hit the eject button on me without probable cause to hide her incompetence and abuse. She sought to escape liability for a high-risk patient - she sought to do that from the very first visit. Ms. NP was set up by her peers to fail and left the clinic so as not to face consequences for her actions. Someone from behind the scenes coached her same as Ms. PhD psychologist. Employee back stabbing is beyond belief at VA! I have seen this done to other Vet patients before understanding some of the agencies methods behind its madness. On the surface it appears the Veteran's are at fault for why VA is losing patient numbers; not what VA staff is doing causing those losses! VA currently treats less than 8% of total US veteran population. Losing more of us to the private sector is its undoing. Soon not enough will remain to support the agency's existence at all. Consequence is sunset, and dissolution of the agency as a liability too great to bear. When these useless eaters are paid for doing nothing, veterans hanging around a clinic only distract them and clutter up the place. *Same for Vet suicides on and off VA campuses!* Out of willful, blind-stupidity, no one asks or even looks at what that institution's staff is doing behind closed doors causing and exacerbating VA driven patient losses and suicide deaths! That was my reason for walking away over 40 years ago after discharge and swearing I would die before ever setting foot in that shit hole again after my tolerance for bureaucratic mistreatment and racism reached maximum limits. Same reason for firing VA again decades later. Not much about that govt agency has changed since then - just different facilities, faces, and politicians: SOS in a different paper cup. *Appointment no shows and suicides are Veteran protests against VA employee mistreatment that we receive from the worst socialist healthcare and benefits system in America.*

Over 92% of US Veterans all say exit from VA to private sector medicine works Very Well.

~OR~

Private healthcare works while
VA Socialized healthcare destructively fails 100%.

According to over 92% of all US Veterans that never set foot in a VA facility and per all of us who abandon it for private sector medical care each day either partly or in toto VA Privatization works quite well.

100 veteran suicides daily firmly state that not only does VA not work it is criminally vicious to them! 24 veteran suicides in an 18-month span between 2017-2019 on VA parking lots, in clinics and elsewhere on campus property all exclaim that VA is a total FAILURE written in veteran blood!!!

Opponents of VA privatization claim that VA privatization will never work citing end of the earth dire consequences at mere mention of such blasphemy. How can they know that? VA and Congress have never mutually attempted to consummate what most veterans are already doing. Every Veteran I personally know using VA only goes there for service connected circumstances and to maintain his or her disability benefits status from another re-denial. The rest of their medical care, including medicines, come from private sector healthcare, oft times including service connected conditions because they mistrust VA's incompetence to not cripple them more!!

The most damning fact that privatized Veteran healthcare works is over 92% of all US Veterans do not use it at all, per a Rand Report. VA 'cooked' numbers admit that over 85-90% do not use VA at all. That institution has a very bad reputation and is why VA wallpapers the Internet with PR & propaganda to the contrary! That is why that company cannot hire competent doctors, nurses, admin, and medical personnel. Having VA on a resume is career suicide except at a skid row clap clinic located over an ambulance chasing law firm. **Of those employees working at VA, if any of them had a whit going for s/he these derelicts would**

be working in the private sector not as civil service deadbeats sucking on the taxpayer sugar tit. Independent polls, unskewed by VA bias, from a cross section of all US Veterans that responded irrefutably confirmed that over 88% of them want private healthcare choices outside of VA control and influence. When such opportunity arrives; they want true choice to exit the worst healthcare system in America if one can even call it that much. ***In other words, a majority of military veterans want private care, do not use VA at all; and those who do only use a small part of it to maintain financial benefits notwithstanding the captive 'prison inmates' trapped there with no place else to escape except suicide.*** 100 of these captives commit suicide every day ending their pain in a self-destructive protest against injustice of a national shame. Only the willfully deaf, dumb, blind, and stupid refuse to see this at least vaguely. Congress are you listening?

CHAPTER 11

VA Wimpy Benefits and Healthcare system.

~OR~

**We will gladly pay you in broken promises
someday for your life today.**

VA claims to provide myriad, sundry veteran care programs. Problem is making broken promises and delivering on them are opposites entirely. It *claims* to offer so much... yeah, right! *Just try getting those benefits.* VA takes care of more people who never wore a uniform or served in military – VA's friends and cronies, that veterans! They receive far more benefit than veterans ever collect. **Only fifty-cents of every five dollars budgeted for veteran care ever reaches them at all.** The other four dollars and fifty cents is siphoned off elsewhere. Congress allocates plenty of resources to VA; however, it never gets to us. **VA is among the Queen bitches of thieves; she steals and takes credit for veteran care actually coming from the nation's myriad, sundry, mostly invisible – true, unsung, heroes.** **Families, spouses, friends, good Samaritans, volunteers, neighbors, private medical care, state, county, municipal and private insurance, local, state and other federal medical and benefits systems such as Social Security, Medicare, Medicaid, state, county and local hospital districts, clinics – some veteran charities...** **too many vet charities are sham profiteers exploiting us and that is a**

fact – *an extremely, very few religious organizations. Social Security, municipal, county, state and pvt disability insurance programs pick up and pay for many valid, veteran disability claims that the VA kangaroo judicial processes flatly denied outright.* To put it another way, deadbeat, freeloading VA off-loads budgeted work and costs, taking credit, stealing and mooching off America's private, public and personal safety nets, in addition to robbing veterans and taxpayers stupid, while not doing the tasks that it is paid to do, and the elected lootership in Washington DC – DC stands for does not care – are serious partners in the dirty trick crimes passing those costs into strained personal, family, state, county and municipal budgets. *Put another way, that Socialist company misappropriates funding while shifting a lions share of its work onto other people, institutions, and governments to pay and do, while keeping the 400 billion dollar annual budget taxpayers pay it directly for their friends. War costs draining local municipal, county, state, personal and family budgets enriching freeloading Veteran's Affairs Dept largess exploiting the nation and her veterans. Remember that next time you get nicked for sales, excise, vat, income, property, vat, and myriad, sundry other taxes, fees, ad nauseam...think about how much that freeloading bureaucracy robs from you to care for VA and its crony friends instead of our veterans and their families.* Never forget that when VA abuses a veteran, that agency abuses his or her children, too. **Yes, the biggest child abuser in USA is the VA.** That agency says that war is good for business but only when investing other people's resources, kids and families feeding the parasite that is killing your loved ones. **Dept of Veterans Affairs, if you persist in being a parasite stop murdering the hosts!!!** VA loves her free lunch and ride sucking on taxpayer sugar tit and parasitically feeding other people's kids, kin, and resources into their meat grinder to pay for it. **VA gets richer while the nation grows poorer. HOW PC- SOCIALIST.**

CHAPTER 12

**What if VA had a Suicide Crisis Line that
nobody answered?**

~OR~

*****BANG*****

Never mind problem resolved forever. Sorry to bother you for help; go back to playing with yourselves.

VA *crisis chat line* placed me on hold on three separate attempts to use it. VA employs this tool to offload liability & onus onto a vendor so when something goes wrong agency employees remains blameless. When I brought the first 'hold please' to VA's attention the MHC employee searched for the 'call' to hide it while she blamed their vendor... Perhaps those folks figured out what is going on and are pushing liability back onto VA? My MHC treatment consisted of offloading VA responsibility by patient dumping Vets like me onto 'free civilian clinics' while prescribing 'crazy making' drugs that increased suicidal, self-violent black box warnings about self-destructive side effects then used mental abuse to provoke me into self-murder or anything to get rid of a troubled veteran needing help. When that did not work, it assigned me to an untrained caseworker that hid me out until the clinic could figure out how rid me of it. Gee silly me believing their propaganda claiming that VA actually helps veterans. **This government company fights like hell to hold the easy PCP work substituting nurses for competent physicians pushing Band-Aids, pills, shots, and pointless lab work. Simple things that my mother or grandmother doctored at the kitchen sink and/or table. Identical services to what one can get at a local Walmart, grocery store or Walgreen's pharmacy!** While dumping onto private sector all high liability patients with serious illnesses and issues. So many severe issues go undiagnosed & untreated by incompetent VA medical staff it is beyond belief. Nurses that cannot read a lab report well enough to explain to a patient. **In sum, what VA does not diagnose it does not treat!** Therefore because of this malpractice many veterans with serious medical issues die from them! Before recent repeal of a 1950's **Feres Doctrine**, which disallowed soldiers and veteran's due process under civil & criminal tort & constitutional laws, lawsuits against US govt, the military, VA, and tort against their individual employees pursuing malpractice and wrongful death crimes were pointless. However, now these people are being sued and imprisoned for their crimes up to and including murder. VA wrongful death suits from veteran suicide and other reasons through Federal Tort act now top over 2 billion dollars and are shooting straight up. So are malpractice suits. VA employees held liable for their actions are going to prison for veteran murder, injuries, and wrongful negligence. VA's answer? Dump the incompetent VA bureaucracy and associated liability into the private sector. The very inept bureaucracy that allowed that Nazi monster to survive crippling and

murdering veterans for over a century is now causing its demise. Total VA privatization is now a long overdue reality!

CHAPTER 13

VA Physician heal thyself you bloody quack.

~OR~

**Keep your hands to yourself and stay away
from me.**

VA MHC is a sham that knows nothing about saving me. First question no one ever passes is “show me your life before giving advice about mine.” None pass that acid test. In the myth of Jesus the Nazarene, he is claimed to have said according to Luke 4.23, [dysfunctional] “physician, heal thyself” [then come see me.] In over 45 years after being diagnosed with anxiety, depression, and more during Military service, all the kings’ doctors, all the queens’ nurses and all the ‘joker’s’ snake oil pill pushers have yet to piece me back together again. I do better with self-created coping except when someone meddles with it especially all those goofy therapists and ‘brain worm’ drugs! That was the reason I contacted the crisis chat line every time – horrible drug side effects from meds that I naively used prescribed by a VA quack that said, ‘trust me these will help you...’ [into a wheel chair, padded cell or the cemetery.] VA’s response when exposed was to hide and cover up incompetence especially the *crisis chat line* ‘hold’ part, then label me non-compliant ‘DO NOT TREAT’ because I protested and volitionally stopped using the med’s without Dr. approval. ***Followed by scapegoating, and blaming their crisis line vendor*** and me for not *phoning* in my calamity. The phone lines nor the ‘chat’ line did not work, which placed me in a double bind, no win scenario VA is so good at creating. Standard bureaucratic CYA finger pointing and silly me, I should have known better than to be suicidal at lunchtime. Back in the newspaper days, Ann Landers wrote an entire column about US medical care and doctors. She wrote never forget half of US doctors graduate at the lower half of their class, and half again below that and those are HMO doctors. VA lies at the bottom of the MD cesspool. The firm offers no care; when confronted by that VA blames the patient while minimizing, ignoring, and denying his or her issues up to accusing a sick vet of faking it. Go figure – only in Socialist Amerika! Moreover, when I reported the crisis *chat line* ‘hold please’ failure the

person claiming to be a VA-MHC provider asked some quantifying questions, typed on her computer for a spell and then said, "I cannot find any record of that call..." I said, 'it is obvious you were not paying attention to what I told you. Until five minutes ago, you did not know the **'chat line'** existed and remain just as clueless now! One does not use a phone for that; so, where are you looking Ms. H?' She bolted upright, turned, and became intently interested in her computer screen for a very long time. Busted in a lie and cover up, she concluded our visit. It was a boring visit anyway. She prescribed very nasty neuro toxin meds that only caused me more harm. I should have known better about that, too. When I explained to Ms. H. my reaction to the previous VA issued medications prescribed to treat depression, violently vomiting within an hour of taking them; she said, "well, nausea is common with some drugs..." Ms. H, I was on all fours over the kitchen dustbin vomiting up my toenails! That is not simple nausea. This clueless, VA – MHC, PA looked at me as if I were growing tulips out of *my* ears. That is the schizophrenic, magic think world of VA medical hellcare. Should it surprise anyone as to why Veteran suicide remains an uncontrollable epidemic? **VA needs the money. Only VA & Amerika can sink so low in cesspool filth profiteering from veteran suffering and suicide.** Profits that fund salaries, benefits, and political pork trough profiteers using the VA system to rob vets and US taxpayers. Again, I went non-compliant and stopped using the drug after 3 weeks. Moreover, when mentioning *the crisis chat line 'hold please'* to a PCP nurse during pre-appointment screening at the North Texas VAMC loop 820 clinic, nonchalantly, dismissively she said, *'sorry to hear that'* then continued her checklist of questions. Yes, nurse, 'bedpan,' *you certainly are sorry.* But what does one expect from a clinic waitress hired cheaply at ten cents for twenty of them that VA uses to run their greasy spoon. They are very coy by questioning **around** patient 'suicidal' tendencies to hide behind barriers of willful deaf, dumb, stupidity. ***Those people really do not want to know, which is perfect, willful blind, plausible deniability!*** Instead of asking directly do I have suicidal ideation or thoughts of it or have I attempted it, the question is "do I need to see a MHC provider." My answer was, 'you are asking me to diagnose my condition. That is your job. Am I suicidal, yes! Have I attempted it, yes! Did I contact the Crisis chat line for help? Yes! Did it help, no! I was placed on hold.' The interviewing nurse's apathetic remark was, "I am sorry to hear about that." ***This shows VA's true attitude to Vet suicides: callus indifferent-incompetence.*** Why not, Vet self-destruction is very profitable to VA; it pays for their jobs, benefits, and political pork. Without question, I have suffered more mental damage while under VA MHC in the last 36 months than since being first diagnosed and treated for serious depression during Military service in the early 1970's. An in service disability VA continued to briefly treat after discharge, again doing more damage, yet denied for disability in 1980 and since. Additionally, **I have faced more stigmas out of US institutions that claim to help us more than anywhere else.** Even now when it comes to mistreatment for

insurance billing & income dollars VA is there to bill me for the disservice. Otherwise for C&P disability nope, no problems that we can see through our magic think, willful–denial–blindness. I have attempted and failed at more suicide attempts since coming under VA treatment in the past 36 months than in the past 50 years since first diagnosis. Just the insane cognitive dissonance of their self–divided, contradictions and drug policies on the one hand, and fervor to mistreat those rejected issues for cash receipts on the pill bottle is crazy making in itself. VA govt run Socialized-healthcare and benefits system is a horrible warning to Americans!! Socialized medicine is a crash and burn head-trip for ex–military using it. If American's do not get their *heads* out of the Obamacare-sandbox, they will be taking one much worse.

CHAPTER 14

Infections and Vermin ‘R’ VA ~OR~ Nasty & filthy & nastier.

Another example of Vet mistreatment is unreported, filthy medical facility conditions causing hospital borne infections especially in the Southern US, which have lower sanitary conditions than what one finds in many third world countries. Untreated these killed hundreds of thousands of veterans including my dad. When the scandal broke public, VA’s corrective action was to devise an interesting metric. Clinics must now report all treated infections to infectious diseases. These reports count against department performance, which negatively affect job advancements, bonuses, raises, and other employee benefits. Therefore, untested, undiagnosed infections are willfully ignored, untreated, and therefore unreported. A very profitable, perverse incentive is it not? For example, when doctors did not order urine tests during urology lab visits, I suffered chronic, untreated VA hospital caused UTI during catheter changes in unsanitary, filthy facilities. Another personal example is that my dad died of untreated, VA hospital caused, infectious staph and gangrene, as did many tens of thousands of other Vets because of that perverse metric. A department’s performance rating is more important than Veteran lives. Incompetent Georgia VA staff doctors murdered my Korean War veteran dad. During a routine surgery, he contracted hospital caused staph infection that turned gangrenous. Staff doctors did not treat or report it and then claimed the infection was antibiotic resistant. When finally diagnosed, gangrene had infected his body and lesions broke out on both legs their diagnosis was to amputate his legs. He refused, so psychopathic clinic doctors labeled dad non–

compliant, 'DO NOT TREAT' and left him untreated; he suffered and died a few days later. Cause of passing written on death certificate hiding the crime: 'failure to thrive.' I guess so after undergoing that much torture! If any man had enthusiasm and zest for life, it was my dad until these Nazi monsters got hold of him! Then there are confirmed cases of death from vermin infestation in VA hospitals. One Veteran literally was stung and bitten to death by fire ants while confined to his bed. I can tell you fire ant bites are very toxic and painful! No one checked on him for days. When one of his family members visited, the person was shocked to find him dead in the hospital bed with hundreds of ant bites all over his body. The person took a picture, which went viral on the Internet and sued the bejesus out of VA. VA apropos hid behind privacy laws against releasing details. More reports of such abuse exist on the web for anyone who wishes to investigate this more. There are the 'VA death panels' briefly mentioned during Obama's reign of VA scandals. Incompetent Nazi doctors and nurses are those 'death panels' in the bigger picture. Rogue staff nurses and personnel mass murder hospitalized veterans - such as Clarksburg W. Va, VAMC – are not those considered as death panels deciding veteran LIFE OR DEATH BY MEDICINE! Secrecy concealed Veteran murders by VA hospital employees in a Clarksburg West Va hospital for decades. For over a century, spiral of silence shrouded the whole mass murdering VA culture against public scrutiny. When civilian, Veteran and VA employees suffering from moral injury and worse reveal internal criminal injustices by vociferously speaking out & shattering VA's glass house, they are severely punished by the whole system including murder! **I cannot fathom a more toxic culture than when honest, humane people must fear the corrupt, dishonest employees among them to stay safe and keep a job.** Was that not the conditions in Nazi Germany during the holocaust especially in its work and death camps? **This same circumstance allowed the Nazi genocides to silently go on during all of WW2; that same attitude roots all genocide in human history including America's criminal past conducting the longest, bloodiest, ethnic cleansing & genocide known to human history; near extinction of America's indigenous, original nation people. Black and white soldiers mass murdering red skinned people in the worst ethnic cleansing know to human history right here in America.** Vets and employees are cowed, bought off, sedated, fearful and more against speaking out, which makes them worse than their butchering Nazi ancestors! VA destroys 'whistle-blowers' in a policy of 'punishing messengers' who try to correct a flawed system, which would help most everyone involved with it except the criminals! The status quo good 'ol girl & boys, member's-only club, gravy trains cannot have that. Consequently, protests go underground where people are speaking up, leaks happen and finally the public is paying more attention, which scares US political lootership into proaction finding ways to remove these liabilities, proper. Recent Clarksburg hospital mass-homicides by one staff nurse epitomized this issue completely. When it affected political

careers, to hide the crimes, Capitol Hill lootership launched into standard political subterfuge kicking up sand, stomping around in outrage, demanding answers and similar political, PR ham-dramatics for media attention. The idea is that when dust settles and people lose interest to focus on new dirt, everything goes back to status quo and business resumes as usual. However, not this time. Survivors, dependents, their lawyers, and media kept demanding answers until Washington ordered meaningful investigations. Politicians do not care about Vets; however, when scandal busts their political *assets*, they quickly get off of them to do something meaningful. Especially mass murder scandals and mounting multi-million dollar lawsuits against VA gaining national attention during election years. The mounting body count remains unknown but you can bet it continues to go on, as it has been doing VA wide for nearly a century. That is not good news during election cycles either. Vet murder is endemic within that system and up until now nobody noticed? Whom are they kidding!

CHAPTER 15

**One List for paying customers
another for charity cases.**

~OR~

**Insured patients got appointments
300,000 charity cases waited to death.**

Department of Veterans Affairs after nearly 8 years of vehement denials finally publicly admitted that it mass murdered over 300,000 veterans that died on secret lists waiting for medical care during Mr. Obama's last term in office. No criminal charges were filed against involved employees. OIG investigations as usual cited lack of training as root cause. OIG is the VA watchdog that only watches the feed dish that VA fills to keep the mutt fat, dumb, and stupid as a box of rocks. 300,000 mass murders and no charges, no victims, no crime...that is Socialism. That is Communist Amerikan justice. Moreover, in addition to the annual 400 billion dollar taxpayer budget this government agency

misappropriates, it exploits veteran private insurance when providing medical care at its clinics and hospitals. **Vets with health insurance and their non-Vet dependents get priority service. Those without it languish and die on “charity case” secret waiting lists of little or no care while VA continues receiving regular ‘capitation’ payments for each active, live Vet on the rolls whether treated or otherwise: money for nothing, pay the murdering Socialists for breathing.** When uninsured, I nearly died on the latter along with those 300, 000 veterans on that ‘murder’ list during the last half of Mr. Obama’s term.

Incompetent desk nurses and PA’s, aka clinic waitresses, playing doctor fill in for chronic qualified medical and administration staff shortages generating revenue at veteran expense that only profits the agency’s training hospitals and clinics.

Nursing is a vocation like waiter or waitress. **Nurses, especially from foreign countries like Cuba, Philippines, Thailand, India, etc are extremely well trained and most importantly – cheap!** Few American nurses will work for what they do and just as well. In other words, VA uses them by the gross to keep costs down substituting incompetent nurses in place of qualified doctors and other staff. That is a liability disaster hell in the making. Before US Supreme Court reversed the **Feres Doctrine** and Federal Tort Act came on line, they could cripple and kill with impunity, and blatantly did so: see Clarksburg W. Virginia VAMC mass murders, which is only one instance of the wholesale crippling and murders of veterans over the nearly 100 years VA has been in power. Now VA and these people are malpractice multi-million dollar lawsuit central costing taxpayers billions in court awards. The agency bawled to US Supreme Court and Congress to reinstate the agency’s immunity and both said not only no, but HELL NO! You made the mess so you clean it up!!! Yet, criminal charges and convictions remain very few – WHY? **The blessing in all the veteran sacrificial suicide protests and major court victories is that full VA privatization is most certain now and for the first time in US history finally vets will get the benefits they were due all along and justice for US crimes against us that will help the living that walk among society.**

So sad is that it seems to take too many deaths before the sheeple and their governments wake up to do anything proactive to stop atrocities such as the aforementioned mass murders. **Never have so many faithful men and women been wasted so badly by this disgraceful nation!!! Why not, it wastes everything else, and one day will look back through the barbed wire, razor ribbon, chains and bars on their imprisoned minds in vague recall of what was freedom lost.** VA employees are Socialist, useless, eaters and liability disasters with plenty of places to happen. *My last horror story with a Ft. Worth TX clinic NP was over seven months of untreated hypertension 210/123 plus or minus 20 points because an unsupervised nurse did not know what she was doing and following ‘do not treat orders’ from another incompetent doctor that I fire that also hid from and simply ignored my problems. This NP was old enough to be my grand daughter – a child who was playing doctor with human*

lives; she was untrained, unsupervised, incompetent and a malpractice lawsuit looking for a place to happen. Her Rx - first try was patient dumping me onto a holding pattern in the Dark Horse Mission Act, and when that failed sent me home with instructions to call 911 in case of stroke or heart attack – in other words, standard, incompetent, bureaucratic, patient dumping. The doctor at Dallas Regional had placed a ‘DO NOT TREAT’ order on my files in retaliation for firing and reporting her deadly incompetence. Furthermore, on each visit VA billing charged 145.00 dollars for office visit and 390.00 dollars for labs to my health insurance. The NP could not read or understand lab results well enough to explain them to a patient. She did this twice plus an initial nurses visit, which cost 165.00 for same Rx: go home and call 911 for symptoms of stroke or heart attack. My insurance paid VA for no care. VA keeps many secret punishment lists when an insubordinate vet talks back to one of those Nazis. That is Socialist, government run, medical care Amerika. You will find these same complaints and worse about British and Canadian NHS systems!!! When first assigned to this NP, I had stage 3 CKD that progressed to ESKD which is dialysis and death while under her mistreatment. During my final office visit to her, she breezed over labs and chirped, “your kidney function is at 15...” I halted her to ask, “Just what does that mean in layman’s terms?” Her quivering voice tone lowered to say, “your kidneys are failing.” Note: ‘15’ is kidney function demarcation point at which one moves into ESKD, dialysis, and death! My level was 25-28, 6-7 months prior upon first arriving to her clinic for treatment. This incompetent NP was killing my kidneys to send me into a graveyard or VA dialysis for dollars racket. I threw a shoe, “and I suppose almost 7 months of untreated hypertension has nothing to do with my kidneys failing?!!!” She threw me out of her office – finally succeeding in ‘dumping’ me into the MHC clinic as a non-compliant, identified problem patient. My crime? I was crazy enough to challenge her injustice and openly speak out about it – LOUDLY – and file a written complaint at the regional director’s level. That is Socialist, government run, bureaucratic medicine! If one of those little VA Hitler’s gets it out for you, where else does one go when the whole US system is NHS? Reports of this very issue come out of Socialist Great Britain and Canada censors very often into the open net as warning to the rest of us that Socialism is a complete failure! Switzerland - once the richest nation on earth is now broke and is dumping its Socialist govt and healthcare systems and returning to capitalistic systems in seeking financial solvency. Moreover, the one stab that clinic NP made at treating hypertension resulted in a negative drug interaction disaster, which caused me great harm. I still suffer numbness in one leg from that SNAFU. The incompetent & lazy NP did not check to see what drugs other VA providers had already prescribed that were listed in my medical records, which might negatively interact with a new one. A hunch sent me to FDA drug site asking that question and there it was! Listed in over eight

compressed pages of negative interactions that advised seriously against doing what she prescribed with what I already was using. Obviously, the lazy bureaucrat never checked. This NP or clinic waitress could not treat her way out of a paper bag, which is typical of the people that VA substitutes for real doctors. The malpractice poster children staff doctors don't do much better, BTW. That last straw sent me private doctor shopping to self-privatize out of VA, again. The newly assigned PCP PACT nurse advocated dialysis by the time I saw him; I was into ESKD and hypertension crisis by then from over 7 months of no treatments. I swear their actions were intended to direct me into dialysis for dollars by killing my kidneys, into cardiac arrest for Baylor Butcher OJT cash or driving me to suicide for more taxpayer sugar-tit profit out of Washington DC! I had spent over 24 months in hypertension hell because VA could not properly treat the disease! VA staff nurses and doctors are not those at all; they are incompetent, glorified, overpaid, bureaucrat, civil servant, desk clerks with an MD or nursing license if that much! Aka - civil service, bureaucratic, desk clerks, waiters & waitresses. At Dallas Regional hospital, six doctors, three that I never met and that never physically examined me acting through a nurse, plus two residents following instructions from a malpractice extraordinaire staff MD that I fired signed off on office visits and issued hypertension prescriptions that did not work and/or caused very harmful, suicidal side effects! Not one VA staff doctor is worth a flip except as a malpractice suit. What little good care I got came from imported contract – job shopper nurses, doctors – and resident or student doctors. In other words, the only qualified care came from temporary medical school students and job shopper civilian contract doctors! They all bailed before or when their contracts ended; I hated to see them go. Ms. NP was a last straw breaking the proverbial wagon wheel, which sent me to the private sector and that is what self-privatizes vets out of VA one at a time.

NOTE TO ALL YOU SPEICIAL BUTTERCUPS that claim, 'VA never did that to me...' It is like when Policeman Dirty Harry proposed to a punk reaching for his weapon while Harry pointed a 44 magnum in his face. He said, 'Punk, did I fire 5 or 6 shots from the most powerful handgun in the world...feeling lucky punk?' The punk was smart and raised his hands. That same issue is before every veteran venturing into VA medical hellcare....are you feeling lucky? It only takes once when lady luck is not there to send you wearing only a toe tag and sheet to the basement morgue or a VA quack cripples you for life, or blinds you for life or..... All you will get from VA is too bad, so sad - file a claim.....still feeling lucky? All the money in this world cannot replace eyesight, mobility or your life!!! I personally know/knew of three veterans previously mentioned that ran out of luck under VA hellcare: one dead, one blind and another crippled for life. I got out alive and hale to write this and more. Keep in mind very few of us 'VA survivors' go to the trouble to leave warnings to those of you smart enough

to heed them. As warning to those of you newbies coming into the system and for the old hands too. VA system is so complicated nobody knows it all. Most veterans are self-serving, 'hooray for me I got mine and to hell with the rest of you war dog' types. I have never seen a more divided and selfish group of people than veteran VSO's and associated vet groups. Divided, conquered, infighting and enslaved by that whole system pitted against them getting their due. The help is here but only for those smart enough to choose whether to use it.... Lady luck abandons everyone eventually. I cannot think of a worse place for that to happen than at VA.
